Play Amateur Hockey

For 35 years, we've taught young athletes the great game of hockey. Mount Lebanon Hockey Association has a team for YOU!

Explanation of callbacks for Mite and Squirt levels:

Some of you are probably wondering about the callbacks and what it means. This will provide you with the explanation that you need.

MLHA is using callbacks at the Mite and Squirt level for final clarification of some players. If you receive a callback request, we need to see your player one more time so that we can properly place him or her. This gives us one more opportunity to evaluate their playing level.

If you do not receive a callback, it does not mean you did not make a team. Some players at the Mite and Squirt levels can be placed after two sessions.

Receiving a callback is not a statement of your son or daughter's ability, but rather the opportunity for us to place him or her properly. Sometimes we will callback players whose level we are sure of, so we can see how other players fit into the group.

MLHA takes pride in doing our best to properly place players on teams where they can learn, develop and, most importantly, have some fun.

If you have any questions regarding callbacks, please let us know.

Thank you,

MLHA
